ARTICLE

Designation : **7-star hog scraper**

Code bobet : **2166**

Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS**

- Hog scrapers are designed for use in de-hairing machines to remove hair from pigs.
- Made of high quality rubber and cloth.
- They are known in industry for their quality, reliability and durability.
- The rubber characteristics provide higher flexibility and durability which allows great results.
- Qualities :
 - * Durable, flexible and strong
 - * Provided with steel bushings AISI 1010
 - * Textile inlays to give an extra long life
 - * High quality rivets and blades

DESCRIPTION :

- Industry standard product
- A 5-ply fabric wedge delivers extra stiffness and longer life.
- The high quality insures less time wasting and reduces replacement cost.
- More stiffness implies more performance, that is especially important for processing units which do not calibrate quite heavy hogs or which overload machines.
- It also provides a better wash during hard hair season.

DESCRIPTION :

Paddle dimensions : 101.6 x 228.6 mm (4" x 9")

Number of knives : 3

Mounting hole diameter : 12.7 mm

Mounting hole distance : 63 mm
