ARTICLE

Designation : **Apron washing stand**

Code bobet : **9784**

Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS**

- Manufactured in stainless steel NF EN 1.4307 (AISI 304L)

Wall allowing the aprons to be hung in order to wash them using a "TURBO-CLEANER" air-water gun projecting pressurized water at 10 bars, without any splashing.

The combined energies of air and water give the gun a very high washing power without degrading the equipment being washed.

The apron washing wall is equipped with:

- an evacuation plug
- 4 height-adjustable feet
- 1 Turbo Cleaner gun mounted on three meters of Tricoclair hose

DESCRIPTION :

Overall Height : 2254 mm

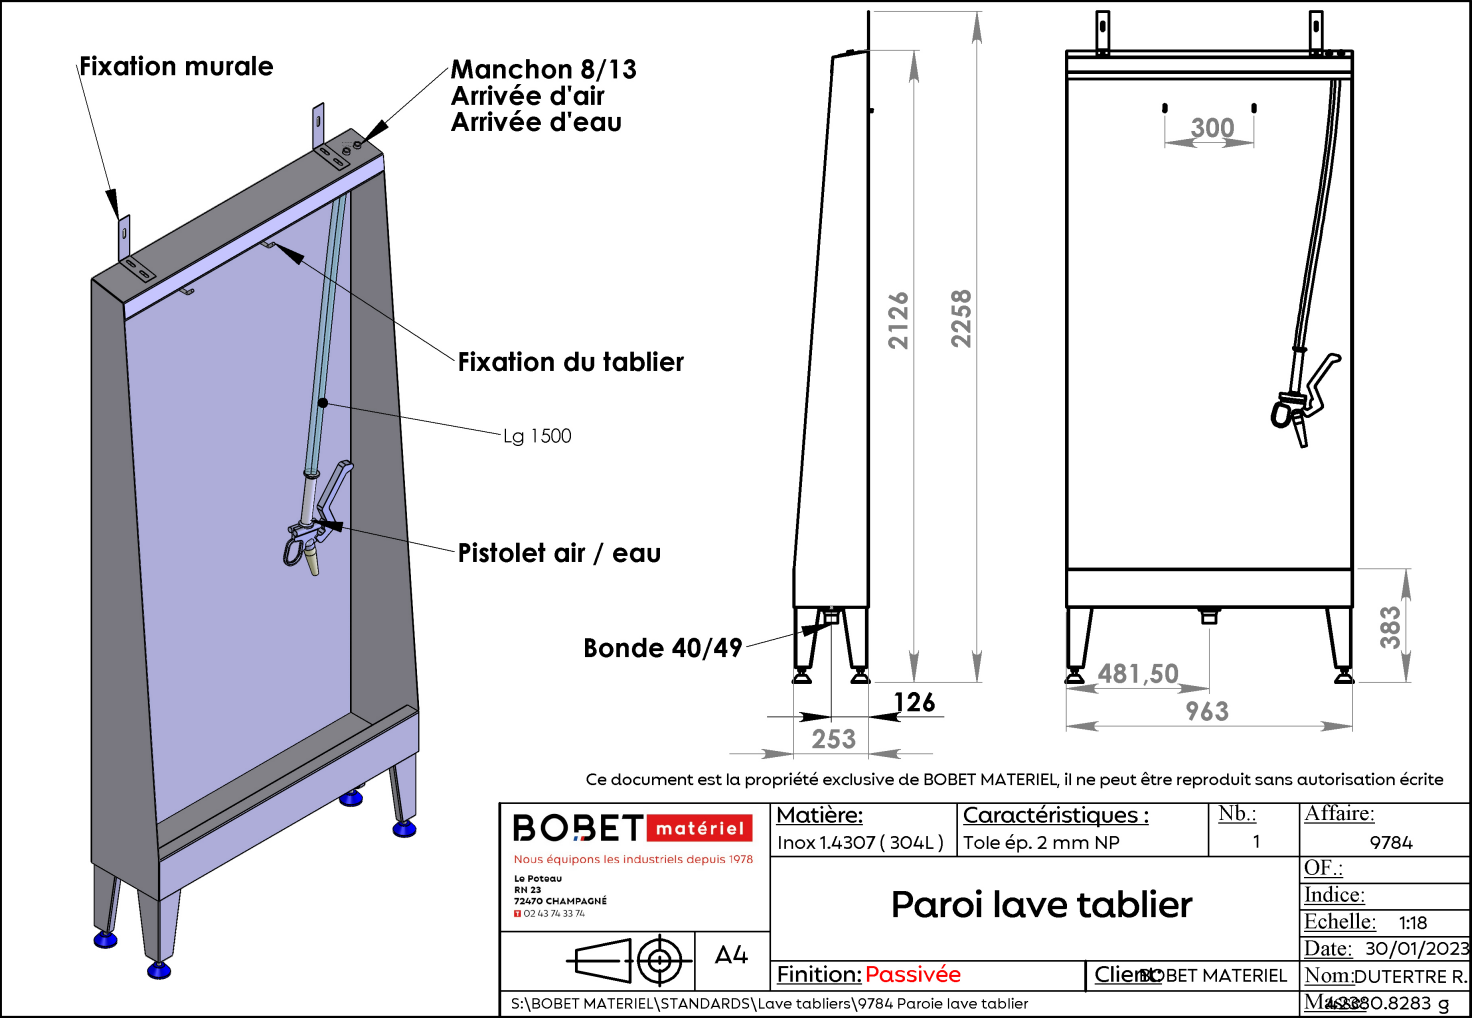

Overall Width : 253 mm

Overall length : 963 mm

ALIMENTARITY :

In order to guarantee their longevity, our products are made of austenitic stainless steel (food contact), standard 1.4307 (304L).

The assembly of the elements is carried out in our workshops, under a protected atmosphere, according to the "T.I.G" welding process.
