

SPECIFICATIONS

ARTICLE

Designation : **Board for derinding**

Code bobet : **70095**

Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS**

- Material: Polyethylene HD 500
- White color
- Overall length: 400 mm
- Overall depth: 330 mm
- Overall height: 120 mm
- Weight: 5.4 kg
- Assembly by stainless steel screws
- With two angles 50 mm thick on the top and 50 mm thick return on the bottom

POLYETHYLENE CHARACTERISTICS

Polyethylene is insensitive to attacks from most acids, alkaline solutions, many solvents organic materials and hot water, thanks to its good chemical resistance. It is a good electrical insulator and can be welded quickly.

- Density (g/cm³): 0.96
- Storage temperature: -60°C to +80°C
- Strength (N/mm²): 27
- Elongation at break: >500%
- Shore hardness (Shore D): 63
- Very low water absorption
- Soft surface (low stiffness)
- Not HF weldable
