Designation : **Composite type finishing wheel**

Code bobet : **7750**

Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS**

- Finishing wheel combined with rod
- Made up of strips of abrasive cloth and strips of nylon fibers impregnated with abrasive
- For finishing work, it makes it easy to obtain, without trace of recovery, a uniformly satin surface finish that is often difficult to achieve
- For shaped parts, the high flexibility of the finishing wheel solves a lot of problems
- This wheel reduces the manufacturing time in often considerable proportions
- Dimensions: 75 x 45 mm
- Rod: D.6 mm
