SAFETY KNIFE WITH PROTECTED BLADE, SPECIALLY DESIGNED FOR FILMS AND PLASTIC STRAPPING

- Metal detectable plastic : suited especially to companies and sectors processing sensitive materials. Even the tiniest fragment of the knife can be traced before any contamination of your products takes place.
- Safety first : The concealed blade and rounded nose reliably protect you and your products.
- the knife head has been significantly strengthened making it more robust and longer lasting.
- Blade change made easy : Simply lift up the blade change button and remove the cover. You can then directly access the 4-cutting edge blade.
- Perfect ergonomics
- The preset cutting angle is also kind to the hand and arm helping you to position the knife for cutting.
- Optimised Blade section : The cutting channel is formed so that your safety knife moves away the freshly cut material even faster, Diagonal cuts are also easier than ever to perform.
- For right and left handers
- Lanyard hole
- Safer blade change (with magnet)
- Cutting depth
- Stainless steel blade
- Abrasion resistant
- Tape Splitter
