- Blue ink
- Detectable metal
- With pocket clip for the code 20332
- Refill blue ink : code 20333

Chrome plating in a decorative nickel-chrome system. This provides a tarnish resistant, pleasing bluish, brilliant, clear deposit on nickel plating. The deposit is hard and therefore resistant to abrasion and wear. Due to these properties, a very thin coating of 0.25 to 0.8 microns of chrome provides a durable and attractive finish.

PACKAGING:

Sold by 50 pens
