

# SPECIFICATIONS

**ARTICLE**Designation : **Earline ear muffs**Code bobet : **23905**Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS**

- Increased hearing protection
- Adjustable hoop 3 positions
- Leather-like PVC pad
- "Comfortable" quality
- Color : Black/grey
- Weight: 166 g

**DESCRIPTION :**

Grey ABS shells, black PVC pad and black polyamide headband

**APPLICATIONS :**

Production, maintenance, all noisy environments ....

**ATTENUATION :**

- SNR = 27.6dB, H = 29.2dB, M = 25.4dB, L = 17.9dB

SNR = Global Attenuation Index (Single Number Rating) (value subtracted from the measured C-weighted sound pressure level, L (C), in order to estimate the effective A-weighted sound pressure level inside the ear)

H = High-frequency attenuation value (value representing the attenuation of the expected sound level for noise with LC - LA = -2dB)

M = Average frequency attenuation value (value representing the attenuation of the expected sound level for noise with LC - LA = + 2dB)

L = Low frequency attenuation value (value representing the attenuation of the expected sound level for noise with LC - LA = + 10dB)

**PACKAGING :**

Individual packaging

**STANDARDS :**

Complies with EU regulation 2016/425 on personal protective equipment (Category III)

Complies with standard EN352-1: 2002" Personal hearing protectors - General requirements Part 1: headband".
