Designation : **Deck-mounted electronic tap**

Code bobet : **17090**

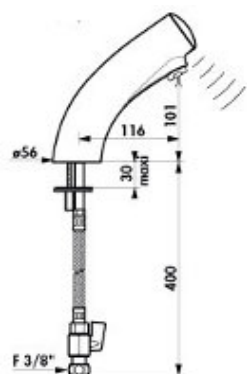

Selling Unit : **Unit**

Non-contractual pictures

CHARACTERISTICS

TEMPOMATIC 3

- Electronic tap for washbasin, deck-mounted, with 6V Lithium battery and solenoid valve integrated in the body of the tap
- Infra-red presence detection
- 3 lpm flow straightener at 3 bars, with adjustable flow and anti-blocking safety
- Anti-bacterial duty flush
- Chrome-plated brass body
- Fixing reinforced by 2 stainless steel rods and nuts
- PEX pipes F3/8" with filters and check valves

N.B. : Provide a pre-mixer to supply the tap in mixed water

BENEFITS

- Can be fixed on any isolated station (without electrical connection) thanks to the 6V Lithium battery.
- Detector hidden in the spout optimizing detection in any hands position
- Constant flow : 3 lpm at 3 bars
- Water saving around 90% compared to standard taps
- Full hygiene without manual contact, avoiding the spread of bacteria/germs transported by hands. Periodic duty flush : avoid water stagnation
- Easy maintenance : Lifetime of the 6V battery : from 3 to 6 years, with integrated wear indicator
- Anti-blocking safety : avoid any blocking in continuous flow (automatic shut-off after 30 seconds and then automatic reset)

- Reliability : solenoid valve non sensitive to corrosion. Foolproof presence detection
- Hygienic aerator : calcifies 5 times slower than a standard aerator

WORKING PRINCIPLE :

- Automatic opening and closing as soon as the presence detector senses hands or when they are removed

APPLICATION :

Public bathrooms, medical areas and food industries, facilities for disabled people, offices, restaurants...
