

# SPECIFICATIONS

**ARTICLE**

Designation : **Fly killer LED DB 900**

Code bobet : **24480**

Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS :**

The effective solution against flying insects without odors or chemicals

- 443 stainless steel construction
- IP54
- Electrocutation model
- Wall-mounted model
- 1 9W anti-glare LED tube (BOBET code 24251)
- LED tubes must be changed every 2 years
- Removable insect collector
- Insects: Mosquitoes, midges, flies, moths, wasps, horseflies...

Consumes 9W instead of 40W with a classic UV model

**WORKING PRINCIPLE :**

- The light attracts, the grid strikes down.
- The light source is very attractive for flying insects, by phototropism
- Attracted insects are exterminated by touching the electrocution grid.
- Instantly blasted insects drop into a removable collection tray
- The LED tube retains its efficiency throughout its life

**INSTALLATION :**

It must be positioned correctly

1. The model must be adapted to the surface to be protected
2. It must work 24 hours a day

**APPLICATIONS :**

Kitchens, hospitals, food stores, laboratories, warehouses, agricultural and food industries, offices...
