Designation : **Fly killer with glue board ceiling hanging**

Code bobet : **17554**

Selling Unit : **Unit**

Non-contractual pictures

CHARACTERISTICS

- Full stainless steel
- Shatterproof tubes (code Bobet 17556) insuring that in case of an incidental breaking of a tube, glass breakings remain in the tube
- Destroys even the smallest insects : Mosquitoes, flies, moths, wasps, horseflies...
- Efficient, insects caught silently and out of sight, odourless
- The glue board is easy to remove, dispose of and replace (code Bobet 17555-pack of 6 yellow glue boards 280x585 mm)
- Index protection IP65 guaranteeing a perfect watertightness of the electric components. In case of spraying of water in the equipment, only the glue board has to be replaced.
- Compatible with our LED tube 9W code 24251

WORKING PRINCIPLE :

The actinic light attracts all flying insects on the special glue board inside the design uplighter, silently and out of sight.

INSTALLATION :

The insect killers are suspended (or hooked) about 6.5 feet above the floor, away from any sunlight. Be sure that the equipment is placed between the entrance point of the insects and the space to be protected.

APPLICATIONS :

Restaurants, hotels, hospitals, food stores, canteens, laboratories, warehouses, agricultural and food industries, offices... Particularly adapted for the food industries to respect the HACCP recommendations

SPARE PARTS :

- Filmed tube UV 36 watts : code 17556
- Glue board 280X585 (pack of 6) : code 17555

DESCRIPTION :

Dimensions : H. 1035 x D. 140 x W. 346 mm

Weight : (No coupling): 917 Kg

Coverage : 240 m²

Tube / Lamp : 2 x 36 W

Power supply : The supplier certifies that this hose, designed for food contact, complies with EU Regulation
50 Hertz

STANDARDS :

- Directive CE 1272/2008 : exigences de protection de la santé humaine et de l'environnement, applicables aux substances chimiques dangereuses.
