Designation : **Foam mask**

Code bobet : **17166**

Selling Unit : **Hundred**

Non-contractual pictures

**CHARACTERISTICS**

- Disposable mask in polyurethane foam, to protect the nose and the mouth
- Flat dimension : L.31 x W.11.5 cm
- Colour : blue
- Used in food industries

DESCRIPTION :

The hygiene mask is made from polyurethane reticulated foam filter (polyester base). The cellular network is fully opened and does not contain any closed cell.

Thanks to calibrated-size and opened cells, and to a three-dimensional network, this foam is an ideal support to filter individual breathing and enables a prolonged use without loss. The foam is made of around 90 cells PPI (pores per inch) with a diameter under 1000 microns, providing optimal filtration.

It does not swell with water, fuels, soaps and detergents, mineral oils, grease...

ADVANTAGES :

- Very fast implementation
- Does not stick on skin
- Does not irritate ears, Flexible
- Comfortable, anti-mist. To prevent mist from rising on spectacles, the mask should be blocked by them.

APPLICATIONS :

Disposable hygiene mask used in food industries and where the user must protect the environment from respiratory impurities. The mask works as a filter of human particles.

PACKAGING :

Dispenser of 50 pieces, box of 2500 pieces.

WARNING :

This mask is neither a medical device nor an individual protective equipment. It can not be characterized as a "barer mask" of category 1 or 2 for a viral protection.
