Selling Unit : **Unit**

Non-contractual pictures

## CHARACTERISTICS

Suitable for sweeping fine dry particles from conveyor belts, food preparation surfaces, tables and equipment in high risk areas.

Layout of bristles blocks : cf the scheme

## PROCESS :

Vikan has reinvented the design and manufacture of cleaning equipment to guarantee the highest levels of hygiene and optimal efficiency in terms of food safety, even in the most critical environments.

ULTRA SAFE TECHNOLOGY products are designed and manufactured to reduce the risk of foreign body contamination due to fiber shedding. It is easy to clean, sterilize and dry ULTRA SAFE TECHNOLOGY products, featuring both thermal and chemical resistance. Their smooth finish and rounded, curved shape reduce the chances of contaminants sticking to the brushes. The space between the fiber blocks facilitates easy visual inspection as well as the removal of debris. All of these features meet the requirements of regulators, auditors and retailers, and are fully tested according to their recommendations.

## DESCRIPTION :

**Material Description :** Polyester

Polypropylene

**Dimensions :** H.135 x D.35 x L.330 mm

**Bristle description :** soft

**Bristle length :** 57 mm

**Weight :** 22.5 kg Kg
