Designation : **Hose clip with ear lugs**

Code bobet : *See table below*

Selling Unit : **Hundred**

Non-contractual pictures

CHARACTERISTICS

HOSE CLIP WITH 2 EAR LUGS, QUICKLY INSTALLED

- The hose clip with 2 ear lugs is quickly and easily installed.
- Thanks to the 2 ear lugs, the clamping range is wider.
- Impregnable, it must be broken to be removed
- During its assembly, a visual check is carried out by observing the deformation of the 2 lugs of the hose clip, which must be correctly closed for optimum tightening.
- With rounded edges, it avoids any injuries to pipes and other materials to be clamped

Material : stainless steel 304 (AISI 1.4301)

APPLICATION :

Particularly intended for original equipment manufacturers, this clamp finds its application on rubber and plastic hoses, on electrical cables, welding and compressed air hoses as well as for use in maintenance and repair workshops.

Clamping area	Ear width	Width	Code Bobet
7-9	4,8	6,0	11791
9-11	5,3	6,5	11792
