## CHARACTERISTICS

Insole only for the Red industry range of U POWER like the SCURO shoe

Insole: WOW2 BASF, removable insole in anti-fatigue material combined with a memory structure whose channels improve air circulation

The removable WOW2 insole is made up of two elements:

- A structure of the arch of the foot in BASF DYNAMIC, with self-modeling properties, able to evenly distribute the pressures of the body weight on the foot.
- An insert made with a revolutionary BASF mixture that guarantees anti-fatigue properties capable of relieving body stress resulting from prolonged standing.

This results in an immediate feeling of well-being as soon as the shoe is worn, resulting in less daily fatigue.

- Anti-fatigue
- Comfort
- Breathable
