Knife type : Boning knife

Blade type : stiff

scalloped

Hardness : 56-57 HRC

Handle type : *Thermoplastique Synthétique*

Temperature for use : -25°C / +110°C sterilizable

All GIESSER knives blades are manufactured from rust-proof Chrome-Molybdenum-Steel, material no. 1.4109 or 1.4110, nickel free.

The rust-proofness of the blades is being improved by careful hardening and surface treatment of the blades.

The handle of the knives series PrimeLine is made from very soft and non-slip plastic material. It is ergonomic, has a comfortable grip and - due to its flexibility - spares sinews and joints. Absolute stability is guaranteed due to the hard core inside the handle. The transition from handle to blade is offset, thus making re-sharpening of the blade very easy.

The different colours of the knives GIESSER handles increase safety, depending on worked meat.

The materials used are health safe and environment friendly.

CARACTERISTIQUES ENVIRONNEMENTALES

Couteau à désosser GIESSER PRIMELINE 11251WW

Codes BOBET : 26080, 26081

Les impacts environnementaux de ce produit ont été analysés le long de son cycle de vie.
