- Long stop

Blade : Serial number

DESCRIPTION :

Knife type : Boning knife

Stiff

Blade type : curved

Handle type : TPE / polypropylene

Temperature for use : -30°C to 120°C (sterilized)

All GIESSER knives blades are manufactured from rust-proof Chrome-Molybdenum-Steel, material no. 1.4109 or 1.4110, nickel free.

The rust-proofness of the blades is being improved by careful hardening and surface treatment of the blades.

The handle of the knives series PrimeLine is made from very soft and non-slip plastic material. It is ergonomic, has a comfortable grip and – due to its flexibility – spares sinews and joints. Absolute stability is guaranteed due to the hard core inside the handle. The transition from handle to blade is offset, thus making re-sharpening of the blade very easy.

The different colours of the knives GIESSER handles increase safety, depending on worked meat.

The materials used are health safe and environment friendly.
