**CHARACTERISTICS**

Handle "guard n°2":

- Extra long stop
- Reduced risk of hand injury

DESCRIPTION :

Knife type : Sticking knife

Blade type : straight
stiff

Handle type : *Thermoplastique Synthétique*

Temperature for use : -30°C to 120°C (sterilized)

All GIESSER knife blades are made from high-quality, nickel-free chrome molybdenum steel numbers 1.4109, 1.4110, and 1.4116.

Following vacuum hardening, precise roughing, and unparalleled polishing, the blades achieve a smooth surface that prevents rust formation.

The handles are made of synthetic material from the Evoprene series (butcher knives). This material is injected seamlessly into the blades, ensuring complete hygiene.

The materials used are harmless to health and the environment.
