ARTICLE

Designation : **Led tube 9W with starter**

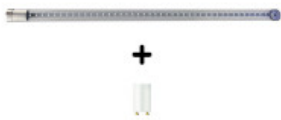

Code bobet : **24251**

Selling Unit : **Unit**

Non-contractual pictures

CHARACTERISTICS

UVAthena® LED Tubes are mounted on all insect killers equipped with UV tubes equipped as standard with 36W tubes - DB 800 AND 8000 AND ALL DEVICES DELIVERED WITH 40 W TUBES ARE EXCLUDED!!! UVAthena® LED tubes have a density of LED points, which allows a more homogeneous distribution of the flux, and has a favorable impact on the attraction of insects (positive photaxis). The tubes can be mounted indifferently in both directions. However, the LED points must be oriented towards the outside of the device. This UVAthena® LED tube is supplied with its specific LED starter and generates an energy saving of 75% compared to a 36W fluorescent tube.

TECHNICAL CHARACTERISTICS

- Lamp Power (W) : 9
- Product Voltage (V) : 100-230
- Intensity (A) : 0,78
- Average life (Nominal) (hr) : 15 000
- Number of LED : 42
- Type : T8
- Base : G13
- Shatterproof coating : Yes
- Supply frequency : 50/60 Hz

PHYSICAL DATA

- Base to base length (mm) - A : 589,8
- Max. Length tube height (mm) - B : 601
- Max. diameter tube height (mm) - C : 28
- Weight (gr) : 90
- Tube Material : Glass Quartz Glass
- Starter LED Starter included

Suitable with our fly killers:

Code 24700 - DB3600

Code 24480 - DB900

Code 24702 - DB1800 old model until august 2024

Code 24495 - A glue

Code 24482 - MG18

Code 24810 - A glue plafond

Code 24865 - AGR18

STANDARDS :

Complies with the provisions of standard EN 62776: 2014

According to the following European directive: 2014/35/EU
