Designation : **Polyfood food grease**

Code bobet : **20230 : S.40**

Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS**

The POLYFOOD grease is an extreme pressure grease, food safe, made from a calcium complex soap and a white mineral oil.

This high-quality multi-purpose grease, class 1.5, prevents rust and oxidation. This product is a lubricant with an excellent lifetime and can be used in large range of temperature : from -20°C to +100°C.

BENEFITS

- Not toxic
- Absence of contamination, cleanliness
- Excellent capacity to support heavy loads("EP" properties)
- Outstanding property against wear
- Strong adhesion, enabling a better lubrication and a reduced consumption
- Lubrication cycle longer at any temperature
- Good resistance to water and steam
- High mechanical and thermal stability up to 100 °C
- Speed : low to medium
- Load : high

APPLICATION

The POLYFOOD grease is specially suitable for lubricating any equipment in food industries : machines for packing, bottling, canning, fish and meat treatment, flour-based foodstuffs process, fillers and any other application where accidental contact with foodstuffs can occur.

PERFORMANCE / ALIMENTARITY

The POLYFOOD grease is NSF H1 approved.
