

SPECIFICATIONS

ARTICLEDesignation : **Rotifix string**

Code bobet :

20800 : 2 strands, tube roll**20801 : 2 strands, centerfeed roll (without tube)****20802 : 2 strands, centerfeed roll (deviroll(bucket))****20803 : 3 strands, tube roll****20804 : 3 strands, centerfeed roll (Filpack (plastic handle))**Selling Unit : **Unit**

Non-contractual pictures

**CHARACTERISTICS**

- Composition: polyester + viscose + binder

- Color: white

Smooth, even, and high-quality appearance, simulating natural twine

- Blend of very strong, full synthetic polyester and rayon fibers. This composition allows it to swell slightly and better lock knots

- Polyester twine that replaces rayon twine

APPLICATIONS :

Main use: tying food (meat, fish, vegetables, etc.)

RECOMMENDED STORAGE / APPLICATION :

- Usage limits: -40°C to +220°C (times specified in the food safety certificate)

- Store and transport in a clean, dry place. Avoid the risk of chemical and organoleptic contamination.

- Usage observations:

* Approx. 1 µg/kg of curing

* Approx. 6 µg/kg of roast for 2 strands and 4.5 µg/kg for 3 strands

PACKAGING :

Carton of 12 kgs (= 12 rolls)

ALIMENTARITY :

Apt to be in contact with aqueous, fatty and acidic foodstuffs.

STANDARDS :

Complies with EC regulations 1935/2004, EC 2023/2006 and EU 10/2011 relating to plastic materials in contact with foodstuffs
