Designation : **Shell FFP3 mask with valve**

Code bobet : **23907**

Selling Unit : **Unit**

Non-contractual pictures

CHARACTERISTICS

White color

Characteristics : SMS Polyester / Polypropylene and Synthetic Rubber Elastic (Latex Free)

Weight: 17g

Shape: Preformed shell mask with valve

Performance: FFP3 NR D

DESCRIPTION :

Non-reusable preformed FFP3 half-mask in non-woven polypropylene, polyester outer layer with exhalation valve, full polyethylene foam nasal seal, synthetic rubber tightening elastic without latex

ADVANTAGES :

Strong reduction in respiratory resistance thanks to the specific design of the exhalation valve. Preformed design, ensuring compatibility with the wearing of glasses or goggles and preventing fogging. The ergonomic shape provides an optimal fit to the face without a nose clip. Respiratory protection against toxic aerosols and dust.

APPLICATIONS :

Usable in the following sectors:

Food industry, chemicals, pharmaceuticals, light industries and communities.

PACKAGING :

Packaged in boxes of 10 masks and in boxes of 12 boxes.

STANDARDS :

Complies with EU regulation 2016/425 on personal protective equipment

Complies with European standard: EN 149:2001 + A1:2006 - Respiratory protective devices - Filtering half masks against particles - Requirements, tests

FFP3 NR D marking

* NR: use limited to one working day

* D: sealing performance
