CHARACTERISTICS

PP ADHESIVE TAPE

- Composition: natural rubber/solvent
- Backing: biaxially oriented polypropylene film
- The PP backing film stretches in the unwinding direction
- Solvent-based adhesive*

* Solvent-type adhesive: Coating with a natural rubber-based adhesive dissolved in a solvent. Instant adhesion, recommended for long-term storage. Good resistance to cold and on plastic products. Good initial adhesion at +7°C.

TECHNICAL CHARACTERISTICS:

- Elongation: 100%
- Breaking strength: 38 N/cm
- Holding power: > 80 h
- Dimensions: 50 mm x 100 m
- Film thickness: 30 µm
- Total thickness: 55 µm
- Adhesive strength to steel: 0.9 N/cm

ADVANTAGES:

- Long-term storage, good resistance to cold and to plastic films

APPLICATIONS :

Featuring quiet unwinding, these tapes can be used with all types of dispensers.

RECOMMENDED STORAGE / APPLICATION :

To preserve all their qualities, it is recommended to store your adhesive tapes at room temperature (around 20°C) and away from direct light.

PACKAGING :

Packed by 36 rolls

CARACTERISTIQUES ENVIRONNEMENTALES

Scotch PP
