CHARACTERISTICS

Composition : 40% wool, 40% acrylic, 8% polyamide, 6% elastane, 6% polyester

- This knee-high sock (Special for winter and cold environments with managed temperatures) with wool loop is comfortable and warm.
- It combines the warmth of wool, the softness of acrylic, the strength and elasticity of polyamide and elastane.
- Comfort and insulation : This model meets the needs of people working in cool or cold environments: outside in the winter, cold rooms, etc.
- Abrasion resistance: Reinforcement of the heel and toe with a special thread.
- This sock can be worn in all types of shoe.
- Size indicated by a specific color code on the front part of the sock.
- It can be washed at 30°, no tumble drying
