ARTICLE

Designation : **Traceability label 85X35 yellow**

Code bobet : **23967**

Selling Unit : **Thousand**

Non-contractual pictures

**CHARACTERISTICS**

- Material: GAMASET SP3 polypropylene
- GAMASET SP3 is a 2-sided, bi-oriented, polypropylene-based coated film
- Recyclable, contains no heavy metals
- Very good tear resistance in both directions without primers
- Resistant to chemicals, water, fats and acids
- Antistatic
- Heat-resistant up to 120 °C and cold resistant up to -25 °C
- Good adaptation to folding and very good adaptation to perforation and cutting without leader
- Very good dimensional stability
- Good stiffness
- Thickness: 150 microns
- Dimensions: 85 x 35 mm
- With drill hole
- Meets the most modern standards of respect for the environment. It can be completely burned without releasing toxic gases.

STANDARDS :

Complies with EU regulation 10/2011 on food contact with plastic materials. Not suitable for food contact with acid products.
